**\$1,000,000
WORTH OF**

TECHNOLOGY!

With our clumsy hands and crude dietary requirements, how can we ever compete with the elegance and sophistication of the next generation of gadgetry? Here are 20 pages of fiendishly smart machines—learn to control them now, or face the consequences!

BY CHRIS CHIARELLA • PHOTOGRAPHY BY PLAMEN PETKOV

**CREATIVE
NOMAD
JUKEBOX 20GB**
\$400

www.nomadworld.com
Dwarfing the memory of their old 6 GB Jukebox (despite using an identical shell), the newest NOMAD holds an almost obscene 333 hours of music or 8,500 hours of voice recording. If you do the math, that's about 500 audio CDs or 354 days worth of filibustering. Pile on the songs and audiobooks—and still have room left for a whole library.

**MARINE TURBINE TECHNOLOGIES
Y2K SUPERBIKE**

\$150,000; www.marineturbine.com
Kudos to the insane genius who saw a helicopter engine powerful enough to carry five men at 100 mph and said, "Why not? Let's add a seat and two wheels and call it a motorcycle!" The Rolls-Royce Allison gas turbine engine supplies more than 300 horsepower. A camera and monitor act as the "rearview mirror," so you don't have to turn to see all those Harleys in the distance.

REMINGTON MB50 TRIMMER

\$60; www.remington-products.com
Remington's Beard and Mustache Trimmer, MB50, features the latest cutting craze: ceramic blades that start sharper than steel, keep their edge longer and run cooler without the need to lubricate. Ever. A handy wheel zips through the nine length settings. Just the thing for skinheads with an eye for quality workmanship.

**TALON AUDIO
KHORUS X
LOUDSPEAKERS**

\$16,000/pair
www.talonaudio.com
They're almost ridiculously awe-inspiring, from the chrome pyramidal tops and high-gloss sheen, to the 400-plus pound heft, to the 1,000 watts of output—enough to wake the dead, and then make their zombie ears bleed. If you can afford to walk the walk, buy a pair and then watch your local housing authority line up to hand out noise violations.
